Team ID	6ab63709856a6a91bc38dc02	Project Name	Import Data using Transform Maps (S

Define Your Technology Stack

Identify the technologies chosen for each component of your architecture.

S.No	Component	Technology	Version / Details	Justification
1	Platform	ServiceNow	Developer Instance	Enterprise cloud platform with native Import Sets
2	Data Source	Microsoft Excel	.xlsx spreadsheet	Standard spreadsheet format for employee records
3	Import Module	ServiceNow Import Sets	OOTB Module	Built-in mechanism for staging external data
4	Transformation	ServiceNow Transform Maps	OOTB Module	Maps import set columns to target table fields
5	Target Table	Employee Test (u_employee_test)	Custom Table Built-	Custom table designed to store employee records
6	Database	ServiceNow Platform DB	in	Platform-managed relational database backend
7	Deduplication	Coalesce (Transform Map)	OOTB Feature	Prevents duplicate records matching on key fields
8	Reporting	ServiceNow Reports	OOTB Module	Built-in report designer for lists, bars, and pies
9	Dashboard	ServiceNow Dashboards	OOTB Module	Consolidates reports into single-pane interface

Technology Stack Architecture

Presentation Layer:

- ServiceNow UI (Dashboards, Reports, List Views, Forms)

Data Processing Layer:

- Import Sets, Transform Maps, Field Mapping, Coalesce Logic

Data Layer:

- Import Set Table (Staging) --> Transform Map --> Employee Test Table (u_employee_test)

External:

- Excel Spreadsheet (Data Source file prepared by team/HR)
