

Import Data using Transform Maps (Spreadsheet)

Project Overview

This project demonstrates the workflow for importing structured employee data from an external spreadsheet into ServiceNow using Import Sets and Transform Maps.

The workflow includes spreadsheet preparation, staging the imported data, configuring field mappings, transforming the data into a custom ServiceNow table, validating the imported records, configuring Coalesce to help avoid duplicate records, and preparing reports and dashboards.

Source Data

The spreadsheet contains the following fields:

- Employee ID
- Name
- Email
- Department
- Location

ServiceNow Target Table

Table: Employee Test

Table Name: u_employee_test

Field Mapping

Source Field	Target Field
Employee ID	Employee ID
Name	Employee Name
Email	Email
Department	Department
Location	Location

Coalesce Field: Employee ID

Project Workflow

1. Creation of the employee spreadsheet
2. Creation of the ServiceNow target table
3. Loading the spreadsheet using Import Sets
4. Creation of the Import Set staging table
5. Creation of the Transform Map
6. Mapping source fields to target fields
7. Configuring Coalesce using Employee ID
8. Transforming and validating the imported data
9. Creating reports and dashboards

Repository Structure

1. Brainstorming & Ideation

Contains the problem statement, empathy map, and idea prioritization documentation.

2. Requirement Analysis

Contains the customer journey map, data flow diagram, solution requirements, and technology stack documentation.

3. Project Design Phase

Contains the problem-solution fit, proposed solution, and solution architecture documentation.

4. Project Planning Phase

Contains the project planning documentation.

5. Project Development Phase

Contains the coding and solution, code layout, readability and reusability, and functional feature documentation.

6. Project Testing

Contains the testing documentation.

7. Project Documentation

Contains the project executable files documentation and sample project documentation.

8. Project Demonstration

Contains the communication, demonstration planning, proposed feature demonstration, scalability and future planning, and team involvement documentation.

Team

- **Mohamed Arsath Parvez** - Team Lead
- **Rithish Kumar K**
- **Gokul K**
- **Ajay V**

Demonstration

A project demonstration video is provided separately through the SkillWallet Demo Link.
